

ML Lab (CS360)

Assignment 9

1. Implement SLP (one architecture) for multi-class classification task using Iris dataset. Follow the below-mentioned instructions to implement your code.
 - a. Plot the dataset before training.
 - b. Check overfitting issue
 - c. Finally report class-wise precision, recall, accuracy and overall accuracy considering 5-fold cross validation.

Please do not copy anyone's code. Try to learn to code.

Thank you
Happy learning
